\* With a tolerance of ± 3 mm on measurements and minimal tolerance in weight.  
 \*\* Steel thickness according to the EN 10346.

## INSTALLATION

The iShingle is installed from right to left and from bottom to top.

The panels are placed onto deck or battens spaced 14.5" or 368 mm.

The panels are simply connected by the use of an interlocking groove that creates a strong, weatherproof and overlapping assembly. They are fixed onto the framework, before interlocking the panel above, so that no nail or screw heads are visible after the panels are assembled.

## COLORS
